

APPENDIX F - Population Health Model

The model we have chosen to represent Population Health in New Brunswick has been adapted from various population health models such as the University of Wisconsin Population Health Institute - Wisconsin County Health Rankings and modified to fit our needs. We have also kept a Canadian perspective by taking into account the determinants of health as indicated by the *Public Health Agency of Canada*.

Based upon review of the literature and expert opinions on how these determinants contribute to health and by how much, we are using the following model as a guide for what influences our health.

This model regroups determinants of health that can be influenced by programs and policies. It also takes into account citizen involvement in their own health and well-being as well as external factors which can influence the health of the population.

ABOUT THE NEW BRUNSWICK HEALTH COUNCIL:

New Brunswickers have a right to be aware of the decisions being made, to be part of the decision making process, and to be aware of the outcomes delivered by the health system and its cost.

The New Brunswick Health Council will foster this transparency, engagement, and accountability by engaging citizens in a meaningful dialogue, measuring, monitoring, and evaluating population health and health service quality, informing citizens on health system's performance and recommending improvements to health system partners.
