21	Health Outcomes	Quality of life	Chronic Health Conditions - Stroke	18 years and over	Both	%	2006-2010	Government of New Brunswick, New Brunswick Health Council, New Brunswickers' Experiences with Primary Care, 2011 Survey Results (NBHC 2011)
21	Health Outcomes	Quality of life	Incidence rates for all cancers	All	M	Age-standardized Incidence Rates for all cancers combined per 10,000 population	2006-2010	Government of New Brunswick, Department of Health, NB Cancer Registry, NB Breast Cancer Screening and NB Medical Registry Databases. Results or views expressed are those of the Author(s) and not the NB Cancer Network. A cancer incidence rate is the number of new cancers of a specific site/type occurring in a population during a year. Since rates are age-standardised, you know that differences in the rates over time or between geographical areas do not simply reflect variations in the age structure of the populations. Analyses finalized by NBHC.
21	Health Outcomes	Quality of life	Incidence rates for all cancers	All	F	Age-standardized Incidence Rates for all cancers combined per 10,000 population	2007-2009	Government of New Brunswick, Department of Health, NB Cancer Registry, NB Breast Cancer Screening and NB Medical Registry Databases. Results or views expressed are those of the Author(s) and not the NB Cancer Network. A cancer incidence rate is the number of new cancers of a specific site/type occurring in a population during a year. Since rates are age-standardised, you know that differences in the rates over time or between geographical areas do not simply reflect variations in the age structure of the populations. Analyses finalized by NBHC.

22	Health Outcomes	Length of life	Potentially avoidable death from treatable causes	All	Both	Rate per 100,000 population	2007-2009	Statistics Canada, Cansim table 102-4311 - Premature deaths that could potentially have been avoided through secondary or tertiary prevention. Mortality from treatable causes is a subset of potentially avoidable mortality. Canadian Institute for Health Information, Health Indicators 2012 (Ottawa, Ont.: CIHI, 2012).
22	Health Outcomes	Length of life	Potentially avoidable death from preventable causes	All	Both	Rate per 100,000 population	2009-2011	Statistics Canada, Cansim table 102-4311 - Premature deaths that could potentially have been prevented through primary prevention efforts. Mortality from preventable causes is a subset of potentially avoidable mortality. Canadian Institute for Health Information, Health Indicators 2012 (Ottawa, Ont.: CIHI, 2012).
22	Health Outcomes	Length of life	Infant deaths	Less than 1 year	Both	Rate per 1,000 live birth	2011	Government of New Brunswick, Vital Statistics, analysis done by the NBHC

ABOUT THE NEW BRUNSWICK HEALTH COUNCIL:

New Brunswickers have a right to be aware of the decisions being made, to be part of the decision making process, and to be aware of the outcomes delivered by the health system and its cost.

The New Brunswick Health Council will foster this transparency, engagement, and accountability by engaging citizens in a meaningful dialogue, measuring, monitoring, and evaluating population health and health service quality, informing citizens on health system's performance and recommending improvements to health system partners.
