

New Maryland Area

These survey results are based on citizens across New Brunswick who have recently received home care services (Extra-Mural Program or home support services or both). Services from the Extra-Mural Program are provided by health professionals such as a nurse, physiotherapist or social worker. Home support services are provided by home support workers to help with tasks such as housekeeping or meal preparation.

Under the Extra-Mural Program, home care services are funded by the Department of Health and delivered by New Brunswick's two regional health authorities, Horizon Health Network and Vitalité Health Network. This survey also covers home support services funded entirely or partially by the Department of Social Development under the Long Term Care Program and the Disability Support Program.

All survey results are weighted by age and gender to better represent the population receiving home care services.
